

# QUESTIONS 1-3

**Q1.** Write a program that prints a path like this:

**C:\Users\John\Desktop\File.txt** using the appropriate escape sequences.

**Q2.** Write a Python program that prints a message with a double-quote character inside it.

For example: **He said, "Hello!"**.

**Q3.** Create a program that prints a message containing both single and double quotes, like this: **She said, 'It's cold'.**
